WILSON STRATEGY.

From the Ohio point of view, as the writer gathers it from sources here friendly to Com, it would be much better strategy for the Presi-Democrats, but, on the other hand, it made other Democrats and independents wonder how far Cox would be obliged to swallow all the defects of the Wilson Administration.

Gov. Cox was not in Washington either in the regislative or the executive hypothesis.

The Curious Visit.

ONCE on a May day a little girl called Agnes went into the garden. She had her kitten with her. Suddenly looking up into the tree she was sitting under, she saw a robin who said: "Agnes, will you come up here and keep my family company?"

Agnes was eager to. Though she could not climb trees easily, she climbed this one. When she was up the tree she looked around her and saw

Out of the house came the little mother robin, followed by three baby robins, "This is my family," introduced the robin. "I am so glad to meet you," sald Agnes politely.

"And we are glad to meet you," said one of the babies. The mother bird then told them to come into the house. Agnes didn't think that she could get in, but she did.

"Why didn't we see you before" asked a baby bird.
"I never heard of you," answered Agnes.
"Let's see who can get to the fence first," suggested one baby bird. It was very surprising but agnes found out she could fig. One of the rest upon the sea, she did not move, ing which was open to the sea, one was but sat huddled against the window. In the centre of the clearing was in more surprised than ever. She had never supposed birds could talk, that she with her head buried in her two arms could climb trees nor, least of all, that she could fly. The father robin said: resting on the sili. "Will you stay with us forever?" Agnes shook her head: "I can't stay with you, but I will come back often. I must go now. Goodby.

Agnes took the baby robins in her hand. Then she rubbed her eyes. She

A couple of yards in front of her, sitting upon its haunches, was a queer animal, covered with long mud-colored nair and hoiding lits fore-paws folded like a pair of erms.
